

B: Programmes run by Public Health Department:

Integrated Disease Surveillance Project (IDSP)

Integrated Disease Surveillance Project (IDSP) was launched by Hon'ble Union Minister of Health & Family Welfare in November 2004. It is a decentralized, State based Surveillance Program in the country. It is intended to detect early warning signals of impending outbreaks and help initiate an effective response in a timely manner. This program helps in identifying infectious diseases from various health facilities like medial colleges, nursing homes private hospitals, GPs, laboratories and take field level control measures to arrest spread diseases among the population.

Sl.No	Disease	Modified case definition
1 A	Diarrhoea Acute Diarrhoeal Disease	Acute watery diarrhoea (passage of 3 or more loose or watery stools in the past 24 hours) with or without dehydration. (Source: Medical Officers' Manual, IDSP, 2006) <input type="checkbox"/> In an area where the disease is not known to be present: Severe dehydration or death from acute watery diarrhoea in a patient aged 5 years or more <input type="checkbox"/> In an area where Cholera is endemic: Acute watery diarrhoea, with or without vomiting in a patient aged 5 years or more. <input type="checkbox"/> In an area where there is a cholera epidemic: Acute watery diarrhoea, with or without vomiting, in any patient. (Source: Medical Officers' Manual, IDSP, 2006)
2	Bacillary	Acute diarrhoea with visible blood in the stool.
3	Dysentery Acute Viral Hepatitis	(Source: Medical Officers' Manual, IDSP, 2006) Acute illness typically including acute jaundice, dark urine, anorexia, malaise, extreme fatigue, and right upper quadrant

tenderness. Biological signs include

increased urine urobilinogen and >2.5 times the upper limit of serum alanine

aminotransferase.

(Source: WHO Recommended Surveillance Standards, 1999)

4 **Enteric Fever**

Any patient with fever for more than one week and with **any two** of the

following:

- Toxic look
- Coated tongue
- Relative bradycardia
- Splenomegaly
- Exposure to confirmed case
- Clinical presentation with complications e.g. GI bleeding, perforation,

etc

5 **Malaria**

A case of fever which may be accompanied with any of the following:

- Headache, backache, chills, rigors, sweating, myalgia, nausea and

vomiting

- Splenomegaly and anemia
- Generalized convulsions, coma, shock, spontaneous bleeding,

pulmonary edema, renal failure and death (untreated falciparum

infection)

Any case of fever in an endemic area may be considered as malaria.

(Source: NVBDCP Guidelines)

6
A **Dengue
Dengue Fever**

An acute febrile illness of 2-7 days duration with **two or more** of the following:

- headache,
- retro-orbital pain,
- myalgia,
- arthralgia,
- rash
- haemorrhagic manifestations
- leucopenia

and with one or more of the following:

- Supportive serology (reciprocal haemagglutination-inhibition antibody

titer, comparable IgG EIA titre or positive IgM antibody test in late acute

or convalescent-phase serum specimen).

- Epidemiologically linked with a confirmed case of dengue fever

(occurrence at same location and time as other confirmed cases of

dengue fever).

(Source: NVBDCP Guidelines)

B **Dengue
Hemorrhagic
Fever (DHF)**

A probable or confirmed case of dengue with the following signs:

haemorrhagic tendencies evidenced by one or more of the following:

- positive tourniquet test
- petechiae, ecchymoses or purpura
- bleeding mucosa, gastrointestinal tract, injection

sites or other

□ haematemesis or melaena

□ **and** thrombocytopenia (100,000 platelets or less per mm³)

□ **and** evidence of plasma leakage due to increased vascular permeability,

manifested by one or more of the following:

□ 20% rise in average haematocrit for age and sex

□ 20% drop in haematocrit following volume replacement treatment

compared to baseline

□ signs of plasma leakage (pleural effusion, ascites, and

hypoproteinaemia

(Source: NVBDCP Guidelines)

C **Dengue Shock Syndrome (DSS)**

All the above criteria, plus evidence of circulatory failure manifested by rapid and

weak pulse, and narrow pulse pressure (< 20 mm Hg) or hypotension for age,

cold, clammy skin and altered mental status.

7 **Chikungunya**

(Source: NVBDCP Guidelines)

An acute illness characterized by sudden onset of fever with any of the

symptoms like headache, backache, photophobia, severe arthralgia, rash and

positive serology (when single serum sample is obtained during acute phase or

during the convalescence).

8 **Acute**

(Source: NVBDCP Guidelines)

A person of any age with acute onset of fever and any of the following

Encephalitis

Syndrome

change in mental status (confusion, disorientation, coma, inability to talk)

new onset of seizures (excluding simple febrile seizures).

other early clinical findings like an increase in irritability, somnolence or

abnormal behavior greater than that seen with usual febrile illness.

Probable JE (Japanese Encephalitis): A suspected case that occurs in close

geographic and temporal relationship to a laboratory-confirmed case of JE, in the

context of an outbreak.

(Source: NVBDCP Guidelines)

9

Meningitis Meningococcal Disease

An illness with sudden onset of fever ($>38.5^{\circ}\text{C}$ rectal or $>38.0^{\circ}\text{C}$ axillary) **and**

one or more of the following:

neck stiffness

altered consciousness

other meningeal sign **or** petechial or purpurral rash

Turbid CSF (with or without positive Gram stain) **or**

ongoing epidemic and epidemiological link to a confirmed case

In patients <1 year, suspect meningitis when fever accompanied by bulging

fontanelle.

(Source: WHO Recommended Surveillance Standards, 1999; /CD Alert, April 2005)

Viral Meningitis

A case with fever $> 38.5^{\circ}\text{C}$ **and one or more of**

the following:

neck stiffness, severe unexplained headache, neck pain

and 2 or more of the following

photophobia, nausea, vomiting, abdominal pain, pharyngitis with exudates

For **children <2 years of age**, a case is defined as a child with fever > 38.5°C

and irritability or bulging fontanelle.

(Source: WHO Recommended Surveillance Standards, 1999)

10 **Measles**

Any person with:

Fever **and**

Maculopapular rash lasting for more than 3 days **and**

Cough **or** coryza (i.e. running nose) **or** conjunctivitis (i.e. red eyes).

(Source: Immunization Handbook for Medical Officers, MOHFW)

11 **Diphtheria**

An illness of the upper respiratory tract characterized by the following:

laryngitis **or** pharyngitis **or** tonsillitis,

and adherent membranes of tonsils, pharynx and/or nose.

(Source: Immunization Handbook for Medical Officers, MOHFW)

12 **Pertussis**

A person with a cough lasting at least 2 weeks with **at least one** of the following:

paroxysms (i.e. fits) of coughing

inspiratory whooping

post-tussive vomiting (i.e. vomiting immediately after coughing) without

other apparent cause.

(Source: Immunization Handbook for Medical Officers, MOHFW)

13 **Chicken pox** A febrile illness with acute onset of diffuse (generalized) maculopapulovesicular

rash without other apparent cause.

(Source: Manual for surveillance of Vaccine Preventable Diseases, 3rd Edition, 2002, CDC)

14 **Fever of Unknown Origin (PUO)** Fever of more than 101°F (38.3°C), either continuous or intermittent, for at least

two weeks, **or**

Fever above 101°F with no known cause even after extensive diagnostic testing

(Source: www.umm.edu/altmed/articles/fever)

15 **Acute Respiratory Illness (ARI) / Influenza Like Illness (ILI)** A person with sudden onset of fever of >38°C and cough or sore throat in the

absence of other diagnosis.

(Source: WHO Recommended Surveillance Standards, 1999)

16 **Pneumonia** Any case clinically diagnosed as pneumonia with symptoms of fever and cough

and/or difficult breathing + chest X-ray confirmation.

or

In a child -

Pneumonia: Cough **or** difficult breathing **and**

breathing rate >50/minute for infant aged 2 months to <1year

breathing rate>40/minute for child aged 1 to 5 years **and** no chest

indrawing, stridor or danger signs

Severe Pneumonia: Cough or difficult breathing

+ any **general danger sign** or

chest indrawing or stridor in a calm child.

(General danger signs: For children aged 2 months to 5 years, the four general danger

signs are unable to drink/breast feed, vomits everything, convulsions, and

lethargic/unconscious)

(Source: WHO Recommended Surveillance Standards, 1999; IMNCI)

17 **Leptospirosis**

Acute febrile illness with headache, myalgia and prostration associated with any

of the following:

- conjunctival suffusion
- meningeal irritation
- anuria or oliguria and/or proteinuria
- jaundice
- haemorrhages (from the intestines, lung)
- cardiac arrhythmia or failure
- skin rash

and a history of exposure to infected animals or an environment contaminated

with animal urine.

Other common symptoms include nausea, vomiting, abdominal pain, diarrhoea

and arthralgia.

(Source: WHO Recommended Surveillance Standards & Zoonosis Division, NICD,2006)

18 **Acute Flaccid
Paralysis**

A case of AFP is defined as any child aged <15 years who has acute onset of

flaccid paralysis for which no obvious cause (such

(<15 yrs of age)

as serve trauma or electrolyte

imbalance) is found and which is epidemiologically linked with a case of polio.

(Source: Immunization Handbook for Medical Officers, MOHFW)

Revised National Tuberculosis Control Programme (RNTCP)

In Chennai this programme was implemented in 1998.

This programme is an important public health programme for detecting sputum positive Tuberculosis among the symptomatic and treat them free of cost with Directly Observed Treatment (DOT) by the TB Units at all our Urban Primary Health Centers. The private hospital and private Practitioners could avail the facility free of cost either by referring their patients or by becoming DOT center.

List of centers run by Corporation of Chennai

LIST OF DMCs

Sl. No	Dv. No.	Zone	Name of the DMCs/ Treatment Centres & Address	Present Status	Remarks
1	2	Zone I	Kodungaiur Dispensary, Kodungaiur EB, Appar Street, Vivekanandar Nagar, Kannadasan Nagar, Ch-118.	Functioning	
2	4		Cherian Nagar Dispensary, Cherian Nagar Main Road, Cherian Nagar , New Washermenpet, Chennai-81	Sputum Collection Centre at Poondi Thangammal HB, New Washermanpet, Div-6.	Dispensary Shifted

3	7		Tondiarpet Dispensary, 602, TH Road, Tondairpet, Chennai-81	Functioning	
4	7		Govt. Peripheral Hospital, Tondiarpet, Chennai-81.	Functioning	
5	14	Zone II	CDH, Tondairpet High Road, Chennai-81	Functioning	
6	22		Stanley Hospital, Royapuram, Chennai-13	Functioning	
7	27		Port –Trust Hospital, Rajaji Salai, Chennai.	Functioning	
8	27		Harbour Dispensary, 12, Adam Street, Royapuram, Chennai-1	Functioning	
9	31		Basin Bridge Dispensary, 60, Basin Bridge Road, Ch-79	Functioning	
10	35	Zone III	Sharma Nagar Dispensary, Chennai-39	Functioning	
11	36		Vyasarpadi Dispensary, 17, Dr.Ambethkar College Road, Vyasarpadi, Ch-39	Functioning	
12	38		Otteri TB Hospital, Otteri, Chennai-12	Functioning	
13	42		Pulianthope TB Clinic –TU, 26, Pulianthope High Road, Pulianthope, Chennai-12	Functioning	
14	48		Trivelyan Dispensary, Water Tank Road, Elephant Gate, Chennai-79	Functioning	
15	49		Govt. General Hospital, Chennai-3	Functioning	
16	50	Zone IV	Govt. Peripheral Hospital, Karthikeyan Salai, Periyar Nagar, Chennai-82	Functioning	
17	51		Sembium Dispensary, 229, Paper Mills Road, Perambur, Chennai-11	Functioning	

18	51		Jaibeem Nagar Dispensary – TU, Jaibeem Nagar, 1st Street, Perambur, Chennai-11	Functioning	
19	55		Iyanavaram Dispensary, 1, Market Street, Iyanavarm, Chennai-23	Functioning	
20	59		ESI Iyanavaram, Chennai-23	Functioning	
21	62		Kolathur Health Post, Srinivasan Nagar, 3rd Main Road, Kolathur, Chennai-99	Only Sputum Collection done	
22	63		Villivakkam Dispensary, East Mada Street, Chennai-49.	Functioning	
23	65	Zone V	Virugambakkam Dispensary, 29, Natesan Street, Virugambakkam, ch-87	Functioning	
24	68		Peripheral Hospital Anna Nagar, 3rd Avenue, Anna Nagar East, Ch-102	Functioning	
25	70		KMC, Poonamallee High Road, Kilpulk, Chennai-10	Functioning	
26	76		Periyar Nagar Special - TU, 17, Sarpathin Street, Choolaimedu, ch-34	Functioning	
27	81	Zone VI	Chintadripet Dispensary, 96, Arunachalam Naikan Street, Chintadripet, Ch-2	Functioning	
28			KGH	Functioning	
29	91		Ice House - TU, Dr.Besent Road, Ice House, Chennai-5	Functioning	
30	93		Govt. Royapettah Hospital, Royapettah High Road, Chennai-14	Functioning	
31	97	Zone VII	Thanthai Periyar Dispensary – TU, 54A, Chellappa Mudali Street, Chennai-7	Functioning	

32	104		ITM, Spurtank Road, Chetpet, Chennai-31	Functioning	
33	105		ICH, Egmore. Chennai-8	Functioning	
34	108		Nungambakkam Dispensary, 38, Noor Veerasamy Street, Chennai- 34	Functioning	
35	116	Zone VIII	Teynampet South Dispensary, 602, Anna Salai, Chennai-6	Functioning	
36	120		Kodambakkam Dispensary - TU, 64, Arcot Road, Vadalapalani, ch-26	Functioning	
37	129		Saligrammam Dispensary, Mapillai Raja Road, Varadharaja Puram, Ch-83	Only Sputum Collection done	
38	130	Zone IX	KK Nagar ESI, KK Nagar, Chennai.	Functioning	
39	132		Saidapet West Dispensary – TU, 42, Periyar Ramasamy Street, Saidapet, Chennai-15	Functioning	
40	139		Saidapet GH, Saidapet, Chennai-15	Functioning	
41	144	Zone X	Mylapore Dispensary, 22, Mundakanni Amman Koil Street, Mylapore, Chennai-4	Functioning	
42	154		Tharamani Dispensary - TU, Thiruvallur St., Tharamani, Chennai 113.	Functioning	
43	155		Thiruvanmiyur Dispensary, 8, East Street, Kamarajar Nagar, Thiruvanmiyur Ch- 41	Functioning	

LIST OF DMCS RUN BY NGO/PRIVATE (Present – Active)

44	16	Zone II	CSI – RAINY HOSPITAL, Royapuram, Chennai.	
46	66	Zone V	Sundaram Medical Foundation, Shanthi Colony, Annanagar.	
45	69	Zone V	Gremaltis Hospital, TP Chathiram, Shenoy Nagar.	
47	96	Zone VI	CSI – Kalyani Hospital, Dr.Radha Krishnan Salai, Mylapour.	
49	142	Zone X	Hindu Welfare Centre, Desigachari Road, Alwarpet.

Corporation of Chennai AIDS Prevention and Control Society (CAPACS)

CAPACS (Chennai Corporation AIDS Prevention and Control Society) was started in 1998 under the directives of NACO, National AIDS Control Organization. There is a need to create awareness about this disease and provide facilities for counseling and testing for HIV at all our health units.

Prevention of Mother to Child Transmission of HIV is one of the important program implemented through all our MCH centers. All the pregnant mothers are offered the choice of having counseling and testing for HIV and STI at the ICTC Centres, located in the health facilities for creating awareness for primary prevention and the positive mothers with their husbands are given supportive care with Nivirapine prophylaxis for mother baby pair during delivery so that the baby turns out to be negative for HIV.

General public could avail the facility from ICTC/VCTC Centres located at the Medical College centers run by CAPACS.

Positive HIV persons are followed up for ART and checked frequently for opportunistic diseases like TB and vice versa.

The blood safety is also taken care by CAPACS with 38 blood banks including Govt.

The following are the Locations of the ICTC centers run by CAPACS.

S. No.	CAPACS- Name of the ICTC Centre with address
1	The Medical Officer / ICTC Kodungaiyur Corporation Dispensary,39,Appar Street,Vivekanandar Nagar, Kodungaiyur,Chennai - 600 118.
2	The Medical officer / ICTC Sembium Corporation Health post,239, Paper Mills Road, Sembium,Chennai - 600 011
3	The Professor & HOD / ICTC Department of STD, Govt. Stanley Medical College & Hospital Chennai - 600 001.
4	The Professor & HOD/ICTC Department of STD/AIDS, Govt. Royapettah Hospital, Chennai - 600 014.
5	The Chief Medical Officer / ICTC Port Trust Hospital, Port Trust of Chennai, Chennai - 600 001
6	The Senior Civil Surgeon ICTC,Government Peripheral Hospital,Periyar Nagar, Chennai - 600 082
7	The Branch Manager / Officer Family Planning Association India, No.54, Arcot Road Vadapalani,Chennai - 600 026.
